Measure E Facilities Bond
Bond Facilities Master Plan
February 14, 2008

The purpose of the Facilities Master Plan is to suggest some guiding principles to be used in the long-range facility planning process. The goal is to achieve a facility configuration that optimizes the use of operational funds and improves the long-term conditions of eligibility of the College/District in the State Capital Outlay program. While the primary focus of this set of guidelines is the improvement of the capacity to load ratios, it is critical to assure that the spaces of the college support the pedagogies and conditions necessary for a teaching/learning environment that is current, comfortable, safe, and beneficial to students, faculty, and staff.
