Permission Letter

The Gavilan College Child Development Center, The Child Care of Choice, is a lab school for the study of young children.

The Gavilan College Board of Trustees approved the creation of a campus laboratory specifically so that college students in any discipline can study, observe and participate in an educational setting with young children.

In order for the Child Development staff to judge the effectiveness of the educational program for your child, we periodically evaluate the children. Whenever this is done, a parent conference will be scheduled to explain information learned that would be helpful. This will insure a unique program specially geared to meet the individual needs of each child. All records of the children will always be confidential.

Please fill out the form below granting permission for the Child Development staff to work with, photograph/videotape, and evaluate your child’s developmental progress.

Thank you for your support.

__________________________
Child’s Name:

I give my permission for the Child Development staff to evaluate my child’s developmental progress during normal school activities.

☐ Yes - I give my permission for my child to be photographed/videotaped during normal school activities.

☐ No - I do not give my permission for my child to be photographed/videotaped during normal school activities.
