The Gavilan College Child Development Center has acquired a security monitoring system. The Child Development Center is a laboratory for learning as part of our Child Development instructional program. The purpose of the video system is to enhance the opportunity for students in the Child Development program to learn about children and their development. Students gain knowledge by observing children learning and at play.

The cameras and security monitoring system at Gavilan College involves the Internet. Parents of the CDC students do not have access. However, a few authorized staff members with triple passwords do have access to the system. These people include: campus security, a child development instructor and the Director of the Child Development Center.

This letter is to inform all parents that the cameras are placed in the classrooms where the children attend and that the purpose is for students who are taking child development classes to learn about children. There are signs posted on the parent boards as a reminder to parents; also, there is a sign when parents enter the building.

The rest of the system is for security purposes. This will allow us to know who is in the building.

This is an acknowledgement that I/we, the parent(s)/guardian(s) of ______________ have received a copy of the monitoring and security system letter. Currently the system is not in operation.
