COURSE DESCRIPTION:

This course is designed for hazardous materials emergency responders. It provides an introduction to the Haz Mat Incident Command System, concepts associated with haz mat response activities, and an in depth study of incident specific considerations influencing haz mat emergencies. Students are introduced to site planning, contingency planning, protective action options, and meteorological considerations.

PREREQUISITES:

COREQUISITES:

CREDIT STATUS: D - Credit - Degree Applicable

GRADING MODES

L - Standard Letter Grade

REPEATABILITY: N - Course may not be repeated

SCHEDULE TYPES:

02 - Lecture and/or discussion

STUDENT LEARNING OUTCOMES:

1. Utilize various hazardous materials reference sources to get information about chemical hazards, safety precautions and mitigation techniques.
2. Recognize protective action concepts, with an emphasis on evacuation and shelter-in-place.
3. Identify the types and levels of chemical protective clothing, describe the protection provided by each, and describe how to elect the proper clothing for specific hazardous materials.
4. Recognize basic ICS concepts as they apply to hazardous materials incidents, the structure of the ICS organization and standard ICS forms and terminology.
5. Identify the duties and responsibilities of the positions within the Haz Mat ICS organization.
6. Identify the three control zones to be established at a hazardous materials incident.
7. Develop a Site Safety Plan and identify the key points that should be made in a safety briefing prior to entry.
8. Identify various non-bulk and intermediate bulk packaging, the types of material they contain, basic design and construction features, and some of the marking requirements.
9. Describe types, construction features, markings, fittings, materials transported, and techniques for handling incidents involving intermodal tank containers, highway tankers, rail cars, maritime vessels and aircraft.
10. Describe how to mitigate pipeline incidents.
11. Identify some of the hazardous chemicals used in illegal drug manufacturing operations, warning signs indicating the presence of a drug lab, and appropriate safety and tactical considerations to take at the scene of a clandestine drug lab.
12. Identify storage tanks found at fixed facilities, the types of materials they may contain, the types of damage they could incur, and how to manage an incident at a fixed facility.
13. Recognize some of the laws and regulations pertaining to hazardous materials, potential areas of liability in handling haz mat incidents, and guidelines to minimize liability.
14. Identify some of the key components of a hazardous materials area plan.
15. Identify the components of an effective incident termination.

CONTENT, STUDENT PERFORMANCE OBJECTIVES, OUT-OF-CLASS ASSIGNMENTS
Inactive Course: 09/24/2012
1 WK  40 HRS  Emphasis of this course is on how to manage a hazardous materials incident and the consideration applicable to various types of incidents. It takes response personnel through the entire process including researching hazardous materials data, initiating protective actions, choosing chemical protective clothing, implementing the Incident Command System, and terminating the incident. It
provides an overview of specific types of incidents, containers, chemical transport vehicles and mechanisms, and applicable laws and regulations. Regular assignments will be made for out-of-class study and research. Student will be required to do selected readings, writing and test preparation homework.

Lecture, discussion and demonstrations will serve as the medium of instruction. Audio-visual aids will be utilized as they facilitate meaningful instruction. Individual guidance will be provided as required.

REPRESENTATIVE TEXTBOOKS:
Required: ^uHazardous Materials 1C - Incident Considerations^s
^uManual^s
^uHazardous Materials 1C - Incident Considerations^s
^uWorkbook^s
Reading level determined to be: 12th + grade level
