Outcomes Advisory Committee

Agenda

April 30th, 2009

Attendees: Carlton Oler, Robert Rink, Vic Krimsley, and Randy Brown

1. Update schedule
Randy updated the committee on his work. He reported scheduling or going to out to most all of the departments to answer questions and remind folks about the need to collect and report data. He reported that this seems to be the most useful way of getting out info. He reminded the committee of the schedule for both course and program-level SLO. Both are being collected this Spring and will be reported for Fall.

2. Administrative Units processes
Randy announced that the administrative units were required to conduct outcomes measurement. Vic provided an example of how this might look. Robert asked about online surveys and suggested that they be used as often as possible. Randy reported that he had already worked with the administrative units and many have their outcomes already measured and that they just need to collect their data. Randy reported that he will work with Joe and the AA program managers.

3. GE Effort
Randy reported that next year the College has to work on assessing data for the GE SLOs. He asked for suggestions on how to do that. Carlton suggested having representatives from each department, maybe chairs for a working meeting. Robert suggested that a plan be delivered ready for these representatives to complete.

4. Summertime input via email
Randy informed people that he will continue to update and ask for input over the summer via email. In the Fall, he will be scheduling the a regular meeting.
