

Life Under the Sun

by Uriel Garcia

Life under the sun is fun,
And so is love under a dark night sky
This kind of life is never outdone
But time will continue to fly by
For the love of that loved one
One must find her a place in your heart
And then hold her tight so your love never
falls apart
In every spring every flower blooms
And with you my heart's thumps are more
like booms
I'm so glad I found you
Or how else would I love you?
With you in my life
My heart rate will never go down to be
the same.
A life without you makes life itself seem
like death
When you're not near me I hear nothing
but your name
I need you like I need breath
A life without love is like an arrow shot
without aim
Or a million days without any rain
To live without love is to live in vain
