

## SI LEADER'S REFLECTION

What were your goals for the session? What surprised you?

What materials and/or tools did you prepare before and/or provide during the session?

What artifacts and/or tools did students create and/or take with them from the session?

What was your primary method of delivery?

- I spoke; they listened.       I facilitated their discussion.       I answered their questions.  
 I redirected their questions, helping them identify answers for themselves.  
 I led a reading and/or writing activity using a tool from one of our handbooks and/or training  
(If so, which one?) \_\_\_\_\_  
 Other activity (please describe)

How did you adapt to the students' needs?

What went well?	What would you do differently next time?

Any other thoughts you'd like to share?
