SSSP Retention 2017 - 2018

Outcome	Assessment/ Measurement	Result	Use of Results
Increase persistence and retention of new students.	Identify new students who have completed SSSP steps or who have received other retention services and determine retention levels across populations.	IT tools to measure these results still do not exist.	Other follow up with students was performed, but was not as efficient without tools.
Provide improved streamlined services in conjunction with other Student Services areas.	Provide surveys, focus groups or other methods of assessing effectiveness of services.	Streamlined communication used to communicate with various populations utilized	Participation in workshops was minimal, but those that did attend were more informed about how to improve their status.
Increase recognition of Student Achievement	Identify President's list students and host a President's List reception	145 Students were identified, 12 students attended.	A reception for continued recognition for this population planned for Spring 2019
