Vision/Narrative

Vision and Goal

It is our belief that educational success is achieved by understanding and enhancing one's own learning process. The Tutoring Center staff is committed to providing students with the opportunity to develop positive attitudes about themselves, their studies, and their learning skills. The goal of tutoring is to guide students to independent learning. This is accomplished by providing tutees with the opportunity to be actively engaged in the discussion and manipulation of course material. As an active learner, the tutee accepts responsibility for their own learning, which results in increased self-confidence and steady progression towards educational and personal goals.

Feedback from Supervisor / Dean

Student Life is currently using a scheduling program for Welcome Center that is very cost effective and easy to use. Perhaps the center would be able to use this as well.

What is the plan for Number 1 as NetTutor is not well used. What online tutoring could be done in another way? For example, the College has adopted Cranium Cafe, which could allow tutors to do online tutoring from their desktop. CCCConfer also uses Zoom for virtual meetings which is free to the college.

What assessment of student tutoring needs has been done and how are their needs being met and evaluated? Your SLOs could be addressing these issues and tracking student outcomes compared to those students who do not use the center.
