STUDENT LEARNING OUTCOMES:

By the end of this course, a student should:

1. Students will analyze pre-written patient care plans and will implement the plan of care safely.
2. Student will use principles of college level mathematical concepts to correctly calculate a resident fluid intake and output, and using metric and apothecary systems to calculate height and weight.
3. Students will interact effectively with people of all ages, many cultures and ethnicities demonstrating awareness of the students' own values and opinions, as well as awareness and respect of the opinions and values of others.
4. Student will begin using nursing process to prioritize and organize nursing care and to problem solve. Nursing process includes: a. Assessment of objective and subjective patient data b. Analyzing the data and using the information to develop patient outcomes in planning patient care c. Listening and implementing nursing interventions which will accomplish the defined outcomes for a given patient d. Evaluating the interventions' effectiveness in meeting the outcomes e. Revising the plan of care as needed based on the information from the evaluation.
5. Student will use therapeutic nursing interventions which reflect the standard of nursing practice. This will be exhibited by the student's ability to use psychomotor and psychosocial interventions which promote health; and prevent, minimize, or resolve problems as identified by the nurse and patient. Therapeutic interventions are independent actions grouped in theory-based research and experiences.

CONTENT, STUDENT PERFORMANCE OBJECTIVES, OUT-OF-CLASS ASSIGNMENTS

Curriculum Approval Date: 2/9/2020

LECTURE CONTENT:

The Fundamentals of Nursing Course will prepare students to perform basic nursing skills and duties in the convalescent care setting. The course

includes lecture and clinical practice in the nursing lab and at local convalescent hospitals. At the completion of this course, students who have maintained a grade of "C" and have complied with the attendance policies will be eligible to apply for certification from the State of California which will complete job entry requirements. Gavilan College students earn 8.5 college units for successful completion of this course.

Skills learned will include: promoting resident rights and independence, medical and surgical asepsis, body mechanics, rehabilitative/restorative care, emergency

procedures and prevention of catastrophe, resident care skills, vital signs, weights and measures, resident care procedures, nutrition, observation and charting.

LAB CONTENT:

Lab will consist of 8 contact hours per week, total of 144 hours. Lab practice will include:

1. Performing selected nursing procedures required to meet a resident's basic needs.
2. Completing assigned resident care.
3. Work effectively with other nursing team members in order to provide optimum resident care.
4. Report observations and the effects of his/her care given to the assigned resident.
5. Establishing a rapport with resident and obtaining information from resident.
6. Recognizing that each resident is a unique individual with varying needs.
7. Recognizing ethical and legal implications of administering nursing care.
8. Assuming responsibility for his/her own professional image.
