

Course Outline

COURSE: JFT 214 **DIVISION:** 50 **ALSO LISTED AS:** JFT 11

TERM EFFECTIVE: Fall 2018 **CURRICULUM APPROVAL DATE:** 11/13/2017

SHORT TITLE: RESCUE SYSTEMS I

LONG TITLE: Rescue Systems I Basic Rescue Skills

Units	Number of Weeks		Contact Hours/Week		Total Contact Hours
1	18	Lecture:	.45	Lecture:	8.1
		Lab:	1.82	Lab:	32.76
		Other:	0	Other:	0
		Total:	2.27	Total:	40.86

COURSE DESCRIPTION:

This course familiarizes the student with the requirements for the California Urban Search and Rescue (US and R) Basic and Light Operational Levels. Topics include: Team organization, rescue and environmental considerations, use of ropes, knots rigging and pulley systems, descending, rappelling, and belaying tools and techniques, subsurface rescue and belaying tools and techniques, subsurface rescue hydraulic tools, use of fire service ladders in specialized rescue situations, and day and night simulated rescue exercises. This course was previously listed as JFT 11.

Prerequisite: JFT 225 - Fire Fighter I Academy Requisite Comment: 1. State Fire Marshall certified basic firefighting academy diploma or equivalent as determined by the Dean of Academy Instruction. NOTE: Approval of equivalent training is not a guarantee state regulatory or licensing agencies will also grant equivalency. 2. Prior to beginning this course students must already be familiar with, and be able to demonstrate all of the skills listed below. These will not be taught in the course; rather, they will be the starting point for advanced officer training that builds upon them. These minimum knowledge and skill levels are regarding: Familiarity with firefighter safety, Familiarity with personal protective equipment, Familiarity with building construction, Knowledge of rescue knots and hitches, Knowledge of rescue operations, Familiarity with ladders.

PREREQUISITES:

Completion of JFT 225, as UG, with a grade of C or better.

COREQUISITES:

CREDIT STATUS: D - Credit - Degree Applicable

GRADING MODES

P - Pass/No Pass

REPEATABILITY: N - Course may not be repeated

SCHEDULE TYPES:

- 02 - Lecture and/or discussion
- 03 - Lecture/Laboratory
- 04 - Laboratory/Studio/Activity

STUDENT LEARNING OUTCOMES:

1. Demonstrate techniques to perform victim rescues safely and effectively when working around the structural collapse of a building including planning, utilizing system attachments, anchor systems, safety lines and ladders, and providing medical care to victims,

Measure of assessment: Scenario Training, Skills Exam

CONTENT, STUDENT PERFORMANCE OBJECTIVES, OUT-OF-CLASS ASSIGNMENTS

Curriculum Approval Date: 11/13/2017

LECTURE CONTENT:

I. The California Urban Search & Rescue System

1. Four levels of operational capability
2. Training
3. Five general construction categories

II. Rescue Operations

1. Four phases of structural collapse
2. Checklist for the management of a structural collapse rescue
3. US&R search described
4. The search marking system

III. US&R Safety and Medical Care for Victims

1. General hazards of a structural collapse
2. Four general types of building construction hazards
3. Four types of collapse patterns
4. Necessary personal protective equipment to use during an incident
5. Safety and medical considerations to take during an incident
6. Injuries associated with a structural collapse
7. Basic infectious disease precautions to take during an incident

IV. US&R Planning and Preparation

1. Legal authority and responsibility for US&R
2. Development of a vulnerability and hazard assessment
3. Resources for a US&R incident
4. Effective response coordination
5. Training needed for local resources
6. Budgetary needs during a US&R incident
7. ICS, SEMS, and NIMS as they relate to a US&R incident
8. Communications necessary for a US&R incident
9. Scene control
10. Federal and State resources

LAB CONTENT

V. RESCUE KNOTS AND HITCHES

1. Six required knots
2. RSI required knots

VI. Anchor systems

1. Considerations when selecting anchors
2. Types of anchors
- VII. Rescuer and ambulatory victim packaging
 1. Rescue harnesses and rescuer packaging
 2. Donning class III harnesses
 3. Packaging a victim
- VIII. System attachments and fall restraint
 1. System attachments
 2. Attaching a rescuer
 3. Attaching an ambulatory
 4. Attaching a rescue litter to a rope rescue system
- IX. Belay/Safety Line Systems
 1. Key points regarding the operation of a belay/safety line system
 2. Belay/safety line configurations
 3. Lowering operations-basic configuration
 4. Retrieval operations-basic configuration
 5. System variations
- X. Rappelling/Descending
 1. Descending techniques
 2. Rappelling techniques
- XI. Lifting and moving heavy objects
 1. Tools types, capabilities, and safety considerations
 2. Types of jacks, operating principles, and safety precautions
 3. Personal protective equipment, safety precautions and medical precautions
 4. Rescue team positions
 5. Raising, stabilizing, rotating, and lowering a heavy object
 6. Extricating a victim from under the object.
- XII. Breaking and Breaching
 1. Tool types, capabilities, and safety considerations when breaking and breaching.
 2. Light-frame structure design
 3. Appropriate personal protective equipment, safety precautions, and medical precautions.
 4. Breaking and breaching operations
- XIII. Ladder Rescue Systems
 1. Ladder slide
 2. Exterior leaning ladder
 3. Interior leaning ladder
 4. Cantilever ladder
 5. Ladder gin
 6. Ladder "A" frame
- XIV. Shoring systems
 1. Techniques to mitigate structure collapse hazards
 2. Steps involved during shoring size-up
 3. Positions, roles, and responsibilities of the shoring team
 4. Types of shoring systems
 5. Basic tools and equipment for emergency shoring operations
 6. Timber Spot Shore
 7. Two-post Vertical Shore
 8. Horizontal Shore

9. Window and Door Shore
10. Sloped Surface Shore with Cribbing
11. Split Sole Raker Shore System

METHODS OF INSTRUCTION:

Lecture, discussion, scenario training and demonstration will serve as the medium of instruction.

OUT OF CLASS ASSIGNMENTS:

Required Outside Hours:

Assignment Description: Reading Assignment: Review types of collapse patterns in Rescue Systems 1 Student Manual.

Required Outside Hours:

Assignment Description: Writing Assignment: List different types of ladder systems and describe their uses and components.

METHODS OF EVALUATION:

Skill demonstrations

Skills Exam, Scenario Skill Demonstration

Objective examinations

REPRESENTATIVE TEXTBOOKS:

Required Representative Textbooks

California State Fire Training. Rescue Systems 1 - Basic Rescue Skills Student Manual. California State Fire Training,2010.

The California State Fire Marshal has updated textbook and materials 2010, no further textbook updates.

Reading Level of Text, Grade: 12 Verified by: Doug Achterman
