STUDENT LEARNING OUTCOMES:

By the end of this course, a student should:

1. Apply clinical reasoning and the nursing process related to the care of the adult patient with medical surgical nursing needs.
2. Identify evidence-informed practices related to the nursing care of patients with common medical-surgical conditions.
3. Collaborate effectively with healthcare team members and patients to deliver optimal care.

COURSE OBJECTIVES:

By the end of this course, a student should:

1. Provide safe quality patient-centered nursing care for the adult medical surgical patient.
2. Integrate evidence-informed practice to deliver optimal patient care.
3. Function as an active member of the inter-professional team to provide and improve patient outcomes.
4. Use critical thinking principles to provide optimal patient outcomes and continuous quality improvement.
5. Use nursing informatics and trends in technology to enhance team communication and the delivery of safe optimal care.
6. Identify foundational protocols of the nursing process for providing nursing care for diverse populations of adult and older adult clients.
7. Describe the importance of delegation, prioritization, case management, and discharge planning in the care of adult and older adult clients and their families.
8. Identify components generally included in teaching plans, including available community resources, for diverse adult and older adult populations.
