Voice Rover Portable AC/Battery Powered PA System

Voice Rover is a compact, easily-transportable AC/battery- powered PA system that solves your dilemma of how to deliver true professional-grade sound reinforcement to an outdoor event or large interior space when there is no access to AC power.

Multi-mission capable, the Voice Rover can operate for up to 12 hours off its built-in rechargeable battery, which provides a cord-free power supply for its powerful internal Class D amplifier. The amplifier drives a high-output 10-inch 2-way speaker system in a compact, lightweight enclosure. It can also be plugged into an AC outlet. This means that the Voice Rover goes wherever you have the need for clear, punchy high- fidelity sound: outdoor weddings and business meetings, backyard barbecues, award/graduation ceremonies, singers/small

Feedback

We know that one of the things you'll use the Voice Rover for is spoken presentations and vocal musical performances. That's why we include a high-quality, 16-channel UHF wireless microphone with automatic tracking/tuning to ensure a dropout-free connection.

Voice Rover also streams music wirelessly from any Bluetooth®-enabled device, plus with its TRS Aux output, you can daisy-chain as many additional Voice Rover speakers as needed to cover any size area with great sound. It is a complete package, ready to fulfill any sound-reinforcement task you put in front of it.

High Performance and Connection Flexibility in a Compact Package

The Voice Rover not only performs any mission you need, it does it with true high-fidelity performance, ensuring great sound at all times. With a powerful, long-excursion 10-inch woofer and 1-inch high-frequency compression driver, it easily

Love it

Best portable speaker owned, only flaw with the unit is the bluetooth that it doesnt have great reach as far as distance or object blocking from phone/tablet/portable device to speaker which it cuts out.

Yes, I recommend this product.
